ABSTRACT

Corneliu Hoffman, Advisor

Darth Vader: There is no escape. Don't make me destroy you. pauses Luke, you do not yet realize your importance. You have only begun to discover your power. Join me, and I will complete your training. With our combined strength, we can end this destructive conflict and bring order to the galaxy. Luke Skywalker: I'll never join you! Darth Vader: If you only knew the *power* of the dark side. Obi-wan never told you what happened to your father. Luke Skywalker: He told me enough! He told me *you* killed him. Darth Vader: No. *I* am your father.

This is the greatest thrill of my life! I'm king of the world! Wooo, wooo!

Wooo, wooo!

– Homer Simpson

Bart the Daredevil

LIST OF FIGURES

Figure	Page
1.1 Caption of a figure.	1
1.2 Short caption for List of Figures	3

LIST OF TABLES

Table	Page
1.1 The values of test statistics and the corresponding critical values at t_0 . $\alpha = 0.1$. . .	1

PREFACE

Blah Blah Blah...

CHAPTER 1 SOME QUOTES

1.1 Thoreau

You never gain something but that you lose something.

– Thoreau

1.2 Unknown

And dropping a barbell he points to the sky

Figure 1.1: Caption of a figure.

Table 1.1: The values of test statistics and the corresponding critical values at t_0 . $\alpha = 0.1$.

t_0	30	60	90	120	150	180
Critical Value	11.2282	10.5357	11.1108	11.7942	11.7343	11.7471
Test Statistic	25.3182	24.6395	24.6049	25.6623	27.1320	29.3247

1.3 Citations

To cite an article use `cite`, `citet`, or `citep`.

For “in text” citations use `citet`: The original result is attributed to von Neumann (1928). Refer to Mardia (1970) for an example. Refer to Mardia (1970) for an example.

For a “parenthetical citation” use `citep`: The computations were implemented in R (R Core Team, 2014) using bootstrap (Davison and Hinkley, 1997; Efron and Tibshirani, 1993).

When citing a book, it is helpful to mention where to find the result by indicating a chapter or a page number or an equation number: Efron and Tibshirani (1993, Ch. 6) discuss additional results.

Add your reference information to the file `reference.bib`. Every time you edit `reference.bib`, run BibTeX on the `dissertation.tex` file so that LaTeX will know what the references are.

Figure 1.2: Long caption to appear under the figure. Make sure the figure is small enough that the caption stays within the margins. Note that the page number is still in the upper right corner of the PDF file; this is how it needs to be, so follow the code in chapter1.tex.

CHAPTER 2 BOB DYLAN

John the Baptist after poisoning a thief, Looks up at his hero, the Commander-in-Chief, Saying tell me great leader, but please make it brief Is there a hole for me to get sick in? The Commander-in-Chief answers him while chasing a fly, Saying death to all those who would whimper and cry. And dropping a barbell he points to the sky, Saying the sun is not yellow, it's chicken. – Bob Dylan, "Tombstone Blues"

CHAPTER 3 SILLYNESS

MY NAME IS NOT DR. DEATH

MY NAME IS NOT DR. DEATH

MY NAME IS NOT DR. DEATH

MY NAME IS NOT DR. DEATH

Bart Simpson on chalkboard in episode 8F18

3.1 Firefly

River: "I took you away from there."

Simon: "No."

River: "I know I did. You don't think I do, but... I get confused. I remember everything. I remember too much and.... Some of it's made up and... some of it can't be quantified and there's secrets..."

Simon: "It's okay."

River: "But I understand. You gave up everything to find me, and you found me broken. It's hard for you. You gave up everything you had."

Simon: "Mei mei, everything I have is right here."

CHAPTER 4 HOW TO PROVE IT

4.1 proof by accumulated evidence:

Long and diligent search has not revealed a counterexample.

4.2 proof by cosmology:

The negation of the proposition is unimaginable or meaningless. Popular for proofs of the existence of God.

4.3 proof by mutual reference:

In reference A, Theorem 5 is said to follow from Theorem 3 in reference B, which is shown to follow from Corollary 6.2 in reference C, which is an easy consequence of Theorem 5 in reference A.

4.4 proof by metaproof:

A method is given to construct the desired proof. The correctness of the method is proved by any of these techniques.

CHAPTER 5 OTHERNESS

In a surprise raid last night, federal agents ransacked a house in search of a rebel computer hacker. However, they were unable to complete the arrest because the warrant was made out in the name of Don Provan, while the only person in the house was named don provan. Proving, once again, that Unix is superior to Tops10.

5.1 deja-vu

Over the years, I've developed my sense of deja vu so acutely that now I can remember things that **have** happened before ...

APPENDIX A SELECTED R PROGRAMS

Text of appendix goes here.

- The function `kernel` is used to compute the kernel function of variances

```
kernel<-function(x,y){  
  h <- 0.5*(x-y)^2  
  return(h)  
}
```
